Body (Interior and Exterior)

Troubleshooting

Symptom	Suspect Area	Remedy
	Dirt accumulated in drain tube	Clear dirt inside of drain
Water leaks from sunroof	Clogged drain tube	Blow air into drain to remove dirt
	Broken or dislocated drain tube, defec- tive or cracked clip	Check tube installation and flange con- tact
	Deteriorated roof lid weatherstrip	Replace
	Excessive roof lid-to-body clearance a- nd improperly fitted weatherstrip	Adjust
Wind noise around sunroof	Loosen or deformed deflector, gaps in body work	Retighten adjust or replace
Sunroof lid makes a noise when move	Foreign particles lodged in guide rail	Check drive cable and guide rails for f- oreign particles
	Loosen guide rails and lid	Retighten
	Foreign particles lodged in guide rail	Check drive cable and guide rails for f- oreign particles
Motor runs but sunroof does not move or moves only partially	Incorrect engagement of motor pinion with drive cable	Check for loosen motor installation and damaged pinion
	Decrease in motor's clutch slipping fo- rce	Adjust
امانه (مسئولیت محدود) میرکاران خودر و در ایران	Increased sunroof sliding resistance or interference of sunroof with drive cabl- es, weatherstrip, etc. due to mal adjus- tment of sunroof	Adjust or replace
Noise in motor (clutch slipping noise fr- om motor when sunroof is fully opened or closed is not an unusual noise	Incorrect engagement of motor pinion With drive cable	Check pinion installation and Retighten motor
	Worn out or damaged motor pinion be- aring	Replace motor assembly
	Worn out or deformed drive cable	Replace
Deer gloss fails to sporets up and do	Incorrect window glass installation	Adjust position
Door glass fails to operate up and do- wn	Damaged or faulty regulator arm or re- gulator	Correct or replace
Door does not open or close complete- ly	Incorrect door installation	Adjust position
	Defective door check assembly	Correct or replace
	Door hinge requires grease	Apply grease
	Striker and latch not properly aligned	Adjust
Hood does not open or close complet- ely	Incorrectly installed hood	Adjust
Ciy	Incorrect hood bumper height	Adjust
Water leak through windshield end re-	Defective seal	Fill with sealant
ar window	Defective flange	Correct

Adjustment

How To Initialize

- 1. Check that the glass has been installed.
 - Finished height adjustment.
- 2. Push the up switch. (Keep on pushing the switch)
 - the slide moved 5mm forward after 15 seconds.

SENBD8217L

- 3. After moving the slide 5mm forward, turn OFF the switch and push the UP switch (Keeping on pushing the switch with continuous operation)
 - If the operation above is normal condition, the sunroof once and closes.
- 4. When the sunroof is closed completely, turn OFF the UP switch initialize the motor completely.

Body (Interior and Exterior)

When To Initialize The Motor

- 1. First operation the vehicle after manufacture it.
- 2. Initial value is erased or damaged because of short power electric discharge during operation
- 3. After using the manual handle.

Operating The Sunroof Emergency Handle

- 1. Use the sunroof emergency handle to close and open the sunroof manually for the following case only
 - To close the sunroof before driving a vehicle in arainy day or on the highway if the sunroof cannot be closed due to failure of the sunroof motor or controller.
- 2. Operating method
 - Remove the overhead console.
 - Push the emergency handle up into the hexagonal drive (A) of the sunroof motor. You must push hard enough to disengage the motor clutch; other wise the emergency handle will slip due to incomplete fit in the motor.
 - Carefully turn the emergency handle clockwise to close the sunroof.
 - After closing the sunroof, wiggle the handle back and forth as you remove the tool from the motor to ensure the motor clutch reengages.
 - A 5mm hex socket may be used in place of theem emergency handle, with a" Speeder" type handle.

• Do not use power tools to operate the sunroof.

Damage to the components may occur.

Interior

Removal

WNOTICE

- Put on gloves to protect your hands.
- Use seat covers to avoid damaging any surfaces.
- 1. Remove the following items.
 - Front pillar trim, both sides.
 - Windshield wiper arms and cowl cover. (Refer to page BE-"Windshield wiper").
- 2. Remove the molding (A) from the edge of the windshield (B). If necessary, cut the molding with a utility knife.

ASIE070B

3. Cut out the sealant using the sealant cutting tool(A) (09861-31100).

4. Remove the windshield (A) carefully using the glass holder (B).

ASIE070D

Installtion

- 1. With a knife, scrape the old adhesive smooth to a thickness of about 2mm (0.08 in.) on the bonding surface around the entire windshield opening flange:
 - Do not scrape down to the painted surface of the body; damaged paint will interfere with proper bonding.
 - Remove the rubber dam and fastereners from the body.
 - Mask off surrounding surfaces before painting.
- 2. Clean the bonding surface with a sponge dampened in alcohol. After cleaning, keep oil, grease and water from getting on the clean surface.
- Apply the glass primer (A) to the side of the windshield glass edge and stick the both sided adhesive tape (B) on the inside of molding (C).
- 4. When attaching the molding, make it in line (D) with the windshield glass and attach the windshield glass pad (E) to the designated place.

ASIE070E

Body (Interior and Exterior)

- 5. Install the spacer (A) install the windshield glass (B) temporarily with marking sure to position them on the center, and then place the alignment mark (C).
- 6. Remove the windshield.

ASIE070F

- 7. With a sponge, apply a light coat of body primer to the original adhesive remaining around the windshield opening flange. Let the body primer dry for at least 10 minutes.
 - Do not apply glass primer to the body, and be careful not to mix up glass and body primer sponges.
 - Never touch the primed surfaces with your hands.
 - Mask off the dashboard before painting the flange.

ASIE070G

10. Use suction cups (A) to hold the windshield over the opening, align it with the alignment marks (B) made in step 15, and set it down on the adhesive. Lightly push on the windshield until its edges are fully seated on the adhesive all the way around. Do not open or close the doors until the adhesive is dry.

ASIE070J

- 11. Scrape or wipe the excess adhesive off with a putty knife or towel. To remove adhesive from a painted surface or the windshield, wipe with a soft shop towel dampened with alcohol.
- 12. Let the adhesive dry for at least one hour, then spray water over the windshield and check for leaks. Make leaking areas, and let the windshield dry, then seal with sealant:
 - Let the vehicle stand for at least four hours after windshield installation. If the vehicle has to be used within the first four, it must be driven slowly.
 - Keep the windshield dry for the first hour after installation.
- 13. Reinstall all remaining removed parts. Install the rearview mirror after the adhesive has dried thoroughly. advise the customer not to do the following things for two the three days:
 - Slam the door with all the windows rolled up.
 - Twist the body excessively (such as when going in and out of drive ways at an angle or driving over rough, uneven roads)
